### Summary

---

Experienced Java backend developer with a strong foundation in software development life cycle (SDLC) methodologies, particularly Agile. Over the past 2 years, I have contributed to the successful delivery of projects by designing and implementing robust microservices, adhering to best practices, and collaborating effectively within Agile teams. While working as a backend developer provided me with a strong analytical mindset, attention to detail, and problem-solving abilities, which are essential qualities for effective project management. Also I gained invaluable experience in understanding project requirements, breaking down tasks, and delivering high-quality solutions on time.

I am excited about the opportunity to leverage my skills and experiences in a project management role, where I can make a meaningful impact and contribute to the success of the team and organization.

### Experience

---

#### Accenture

Bangalore

#### Application Development Analyst

12/2022 - Present

- Actively participated in the end to end architectural design for a broadband service provider based out of Singapore.
- Key Contribution in high level design of the flow.
- Develop multiple REST API's for pin based address fetching and order creation flows.
- Design and implemented database schema for customer help desk portal, henceforth improved the data retrieval speed.
- Ensure 100% application uptime which included cross functional team management
- Participated in code reviews and technical discussions with business teams and stakeholders to conclude high level designs.
- Managed and supervised a 3 person application development team helping them via code review and mentoring that delivered 2 weeks early, \$10,000 under budget and exceeded client expectations.
- Went through the existing business flows/documentation and fixed numerous bugs in the legacy code.
- Conducted training/cross-functional training sessions for a team of 5+ members and new hires, in understanding the application

#### Accenture

Bangalore

#### Application Development Associate

10/2021 - 11/2022

- Created stubs for multiple REST Api's using WireMock and further integrated them with SpringBoot application.
- Created a new service by reconstructing the existing Api's and abstracting the repetitive code, it handled the workflow of almost all the basic services of the product, hence increasing the overall performance and efficiency of the system.
- Implemented JWT authentication for the entire login flows i.e. signup, forgot & reset password.
- Wrote unit tests for multiple flows thereby increasing the aggregated code coverage and improving the overall code quality.
- Key Contribution in PR reviews to ensure code quality, coding standards and minimum number of bugs in production.

### Skills

---

Project Management • Change Management • Strategic Thinking • Stakeholder Management • Team Collaboration • Risk Assessment • Agile Methodologies • SDLC • Java SE • MySQL • Problem Solving • Analytical Thinking • JIRA • Github • SpringBoot • Wiremock

### Courses & Certificates

---

Project Management @Foruppo [DEC 2023 - Ongoing]

Accenture Project Management Job Simulation @Forage [JAN 2024 - FEB 2024]

Generative AI Overview for Project Managers @PMI [DEC 2023]

Foundations of Project Management @Google [DEC 2023]

Agile Principles and Methodologies @SkillSoft [AUG 2023]

### Education

---

Guru Gobind Singh Indraprastha University

B.Tech in Electronic and Communication Engineering

2017 - 2021
