

Dear Mayra Enterprise's hiring team

My name is Izabela de Castilho. I'm writing to express my interest in working as a translator from English to Brazilian Portuguese. Currently, I'm studying psychology at college and this has greatly influenced my interest in translation in this field.

I have experience with voluntary translation and localization, as well as translation for religious content. I would love to contribute to the company as a technical text translation for psychology, as well as translation for general means. I value fidelity to the original text, creativity, and attention to detail. I seek to deliver a translation faithful to the original text but also well adapted to the Portuguese.

I'm interested in this company because of your compromise with high-quality translation and believe I can contribute to your team. My resume is included with this letter, and I would be happy to provide more information or to complete a translation test.

Kind regards,

Izabela.
